SGMIA GO GREEN TEAM:
CONSERVATION MAKEOVERS PROJECTS
GO GREEN NOW!**

**Sign up now for site visit, recommendations,
and cost estimate! Start saving water now!****

****MAKE YOUR APPOINTMENTS NOW for FALL PLANTING SUCCESS !!**

SGMIA CONSERVATION MAKEOVERS use varied plant palettes that thrive in drought settings.

Garden types include the following, and additional custom-designed plantings for your use and enjoyment:

- California native plant gardens
- Drought resistant, color-themed gardens
- Mediterranean raingreen gardens
- Other California & Conservation friendly garden designs, including plans for plantings, water, soil, hardscape, restorations by TEAM artists, growers, and conservationists.
- Ethnobotany gardens (Native Americans)
- Theme gardens (butterfly, plant family, etc.)
- Edible landscape (water conserving)

All Conservation Makeovers are designed for low water use! See below one of our newest project comparisons from thirsty lawn and thirsty water bill to the beginnings of a beautiful new native and drought resistant plants combination front yard with significant reduction in water use and costs. Go with SGMIA's GO GREEN TEAM for your Conservation Makeover.
